A Brocode AI Insights publication

AI Procurement Playbook for UAE Federal Entities

How to write an AI tender that actually gets you a working system.

Inside this report

- 01 Tender structuring
 - 02 Scoring criteria templates
 - 03 Sovereign deployment evaluation
 - 04 Vendor due-diligence checklist
 - 05 Risk and audit clauses
 - 06 Sample Statement of Work
- brocode.ae · hello@brocode.ae · +971 50 761 2213

Tender structuring

This is a preview of the "Tender structuring" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Scoring criteria templates

This is a preview of the "Scoring criteria templates" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Sovereign deployment evaluation

This is a preview of the "Sovereign deployment evaluation" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Vendor due-diligence checklist

This is a preview of the "Vendor due-diligence checklist" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC.
