A Brocode AI Insights publication

2026 Audit-Evidence Bundle for AI

A specimen evidence pack mapped to CBUAE, FSRA, NCA, and ISO 42001.

Inside this report

- 01 Evaluation harness
 - 02 Regression suite
 - 03 Bias and fairness pack (Fairlearn, AIF360)
 - 04 Drift detector pattern
 - 05 Red-team and adversarial
 - 06 Mapping to controls
- brocode.ae · hello@brocode.ae · +971 50 761 2213

Evaluation harness

This is a preview of the "Evaluation harness" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Regression suite

This is a preview of the "Regression suite" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Bias and fairness pack (Fairlearn, AIF360)

This is a preview of the "Bias and fairness pack (Fairlearn, AIF360)" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Drift detector pattern

This is a preview of the "Drift detector pattern" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Red-team and adversarial

This is a preview of the "Red-team and adversarial" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Mapping to controls

This is a preview of the "Mapping to controls" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Talk to our team

If this report sparked questions, we are happy to walk you through the underlying analysis, share the full benchmark dataset under NDA, or design a tailored architecture review for your specific environment. Reach us in whichever channel works.
