A Brocode AI Insights publication

Brocode Data Processing Agreement Template

UAE PDPL + GDPR + DIFC DP Law aligned, EU SCCs pre-filled.

Inside this report

- 01 Roles and processing
 - 02 Sub-processors
 - 03 Security measures (Annex II)
 - 04 Transfer mechanisms (SCCs 2021/914)
 - 05 Audit rights
 - 06 Term and termination
- brocode.ae · hello@brocode.ae · +971 50 761 2213

Roles and processing

This is a preview of the "Roles and processing" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Sub-processors

This is a preview of the "Sub-processors" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Security measures (Annex II)

This is a preview of the "Security measures (Annex II)" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC.
