A Brocode AI Insights publication

GCC Enterprise AI Benchmark 2026

218-respondent primary survey of GCC enterprise AI maturity.

Inside this report

- 01 Methodology and sample
 - 02 AI roadmap maturity
 - 03 Production AI rate (only 14%)
 - 04 Sovereign deployment posture
 - 05 Buying patterns
 - 06 Sector benchmarks
- brocode.ae · hello@brocode.ae · +971 50 761 2213

Methodology and sample

This is a preview of the "Methodology and sample" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

AI roadmap maturity

This is a preview of the "AI roadmap maturity" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Production AI rate (only 14%)

This is a preview of the "Production AI rate (only 14%)" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Sovereign deployment posture
