A Brocode AI Insights publication

Brocode AI Partnership Dossier

Eight named partnerships and what each unlocks for your roadmap.

Inside this report

- 01 NVIDIA Inception Premier
 - 02 Microsoft AI Cloud Partner
 - 03 AWS Advanced Tier
 - 04 Hugging Face Enterprise
 - 05 Anthropic Solution Provider
 - 06 Databricks Lakehouse Partner
- brocode.ae · hello@brocode.ae · +971 50 761 2213

NVIDIA Inception Premier

This is a preview of the "NVIDIA Inception Premier" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Microsoft AI Cloud Partner

This is a preview of the "Microsoft AI Cloud Partner" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

AWS Advanced Tier

This is a preview of the "AWS Advanced Tier" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Hugging Face Enterprise

This is a preview of the "Hugging Face Enterprise" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Anthropic Solution Provider

This is a preview of the "Anthropic Solution Provider" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Databricks Lakehouse Partner
