## Weeks 1-4: discovery and design

This is a preview of the "Weeks 1-4: discovery and design" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

## Weeks 5-8: hardened build

This is a preview of the "Weeks 5-8: hardened build" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

## Weeks 9-12: regulator-ready evidence

This is a preview of the "Weeks 9-12: regulator-ready evidence" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

## Gates and exit criteria

This is a preview of the "Gates and exit criteria" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

## Reference team and cost

This is a preview of the "Reference team and cost" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

# Talk to our team

If this report sparked questions, we are happy to walk you through the underlying analysis, share the full benchmark dataset under NDA, or design a tailored architecture review for your specific environment. Reach us in whichever channel works.
