A Brocode AI Insights publication

Specimen Regulator-Grade AI Risk File

What the regulator wants to see — and what most teams ship.

Inside this report

- 01 Model card
- 02 Datasheet for the dataset
- 03 Bias and fairness test pack
- 04 Explainability suite (SHAP, integrated gradients)
- 05 Controls mapping: ISO 42001, NIST AI RMF, EU AI Act, UAE AI Charter, SAMA, SR 11-7

Model card

This is a preview of the "Model card" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Datasheet for the dataset

This is a preview of the "Datasheet for the dataset" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Bias and fairness test pack

This is a preview of the "Bias and fairness test pack" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.

Explainability suite (SHAP, integrated gradients)

This is a preview of the "Explainability suite (SHAP, integrated gradients)" section of the report. The final published version of this report contains in-depth analysis, benchmark data, reference architectures, and recommendations specific to enterprises operating in the UAE and the wider GCC. If you would like the full version before it is released, please request a copy from the Brocode AI team and we will share an embargoed draft under NDA. We can also arrange a 30-minute briefing with the engineer who authored this section. This preview is intentionally short so that the reader of the gated download can scan the structure of the full report. The body sections of the final publication run between 6 and 12 pages each, with a mix of prose, tables, and figures.
